Reviews and test results for Hexamail Server Free Download 1.00 "I can not speak highly enough of Hexamail. During this difficult time when many companies are failing and/or shutting down I am glad I found Hexamail. With Hexamail I have been able to find and keep with HSP customers, get new customers and even close several accounts. I can't say that I can

offer them as much as I have received from them but their customer service is outstanding and I highly recommend them." Posted 9/20/2017 5.00 "What a very well thought out program. I have been using many different programs to organize my contacts, calendars, and email for over 25 years. I use Outlook, OneNote, and ClearCase to access my computers. I needed a program that used plain text files as a backend. Hexamail is the ultimate solution." Posted 5/11/2017 5.00 "I installed Hexamail as a mail and calendaring system. The software is very user-friendly and all my contacts, tasks and events are stored

on the cloud server. The web interface for getting data in and out of the server is also fairly easy to use. For those who prefer to use the old fashion interface there is an option for Outlook 2000 users. If you use a Windows XP machine you'll find it easy to login in to this using the list of accounts available. There's even the option to log out of any account."

switch on emails to find out who has sent you something." Posted 2/22/2017 4.00 "I am not an email user by trade, but i'm a pro cyclist. I like to keep my communications ahead of the pack and to be able to see all messages received so that i can respond when i am ready for the feedback. This software does it. Simple to use and the backup facilities are of the highest standard. Highly recommend it." Posted 11/21/2015 5.00 "What an excellent
